Note on applying for emergency care

Dear Parents,

From January 4th, 2021, distance learning will apply to your child (initially until January 10th, 2021).

However, you can now belong to the parents who work in so-called critical infrastructure areas (system-relevant areas). Emergency care is provided for your child /en in school and after-school care. The schoolchildren concerned can then work on the tasks they have received from their teacher for the distance learning in the school and visit the after-school care center in the afternoon.

Unfortunately, I cannot tell you today which activities belong to the critical infrastructure areas. We should receive this list and the application for it from the Ministry of the State of Brandenburg in the next week.

As soon as we have this information, you will find out about it on the website of the city of Teltow under Corona - Hotlines, Links & Information.

The **application must be submitted to the administration of the Hort** in writing or by email, as they will have to check it. We assume that confirmation is also required from the employer.

The after-school care centers will endeavor to review and decide all applications submitted on January 4th, 2021 - positive or negative - and they will inform you of the result by telephone.

Children whose parents assume that they (both) are working in systemically relevant professions and apply for it can initially use the care on January 4th at the school, subject to the approval of the emergency care.

If you have any questions, please contact us by December 23rd. either me or the Hort managers.

I wish you and your families a Merry Christmas, time for yourself and your family, time to gather strength. Enjoy the bright children's eyes when the presents are being unwrapped and start the New Year healthy!

Best regards
gez. S. Haller
Manager
